HOW TO USE

Each morning after moisturizing your skin, apply **Mineral Facial Sunscreen Broad Spectrum SPF 30*** evenly to face, neck, chest and backs of hands – anywhere skin is likely to receive sun exposure. If you are using an eye cream, that would come after your moisturizer and before you apply the sunscreen. This formula may be comfortably worn beneath your favorite *Mary Kay*® foundation and other makeup products. Use as much of this facial sunscreen as you need to ensure adequate coverage. That amount may vary from person to person, but we recommend starting with at least a nickel-sized amount.

Spending time outdoors? It's recommended to reapply every two hours (more frequently if swimming or sweating).

In consumer testing,† a majority of women agreed this formula is:

- Smooth, fast-absorbing and easy to spread on the skin.
- Nongreasy and low shine, drying to a natural finish.
- Sheer beneath foundation (so it wears well under makeup).
